SWEET CRUMBS

Bakery & Cake Shop — HTML and CSS Website Project Report

Student Web Development Project | 2026

1. Introduction

Sweet Crumbs is a responsive bakery and cake shop demonstration website designed using HTML5 and CSS3. It introduces bakery products, cake customisation, seasonal promotions, customer testimonials, a photo gallery, and contact information in a friendly storefront layout.

2. Project Objectives

• Build a visually appealing single-page bakery website.

• Organise menu items into clear categories and product cards with prices.

• Create navigation links that scroll to the corresponding page sections.

• Present custom cake options, promotional content, customer reviews, and contact details.

• Use responsive CSS grids and media queries for desktop, tablet, and mobile screens.

3. Technologies and Tools

HTML5 defines the structure, headings, sections, navigation links, images, product cards, and footer. CSS3 controls colours, typography, grids, spacing, shadows, hover effects, and responsive layouts. The source file uses internal CSS inside a <style> element. No JavaScript is required or included.

4. Detailed Website Features

Header and navigation: A sticky white navigation bar shows the Sweet Crumbs brand and links to Home, Categories, Our Menu, Custom Cakes, Gallery, and Contact.

Hero banner: A bakery-themed background image, welcoming headline, tagline, and Explore Our Menu call-to-action introduce the site.

Promotional strip: A pink banner advertises a sample 15% seasonal discount. It is a demonstration offer, not a verified active promotion.

Bakery categories: Six category tiles display cakes, cupcakes, pastries, cookies, donuts, and fresh bread.

Product menu: Sixteen product cards show bakery images, product names, descriptions, illustrative star ratings, prices, badges, and order enquiry links.

Special offer: A two-column promotional feature combines a product image with a seasonal offer message and menu link.

Custom cakes: An image-and-text section describes personalised colours, flavours, messages, sizes, and decoration styles for special occasions.

Benefits: Four cards highlight freshly baked goods, ingredient quality, made-to-order cakes, and gifting.

Gallery: A CSS grid displays bakery photography with one larger image and hover zoom effects.

Customer reviews: Three sample testimonials are presented in a three-column review layout. They are examples rather than verified customer reviews.

Contact and footer: Contact cards contain placeholder address and phone details, opening hours, and a sample email link. The footer provides branding and a Back to Top link.

Responsive design: Media queries at 1000px, 700px, and 380px progressively adjust grids, navigation, banners, and product cards for smaller screens.

5. Development Process

• Identify the content sections and design a single-page structure.

• Create semantic HTML sections and internal anchor links.

• Write reusable CSS variables, buttons, grids, and card styles.

• Add product data, image links, and demonstration contact information.

• Apply media queries and check layouts at different viewport widths.

• Review accessibility basics, navigation, text contrast, and image alt text.

6. Advantages

The project is simple to host, easy to understand, mobile-friendly, visually consistent, and suitable for showcasing bakery offerings without a complex technical stack.

7. Limitations

This is a front-end demonstration. Order Now links jump to the contact section rather than creating an order; there is no shopping cart, inventory, payment processing, database, or user authentication. The images are hosted externally and require an internet connection. Contact

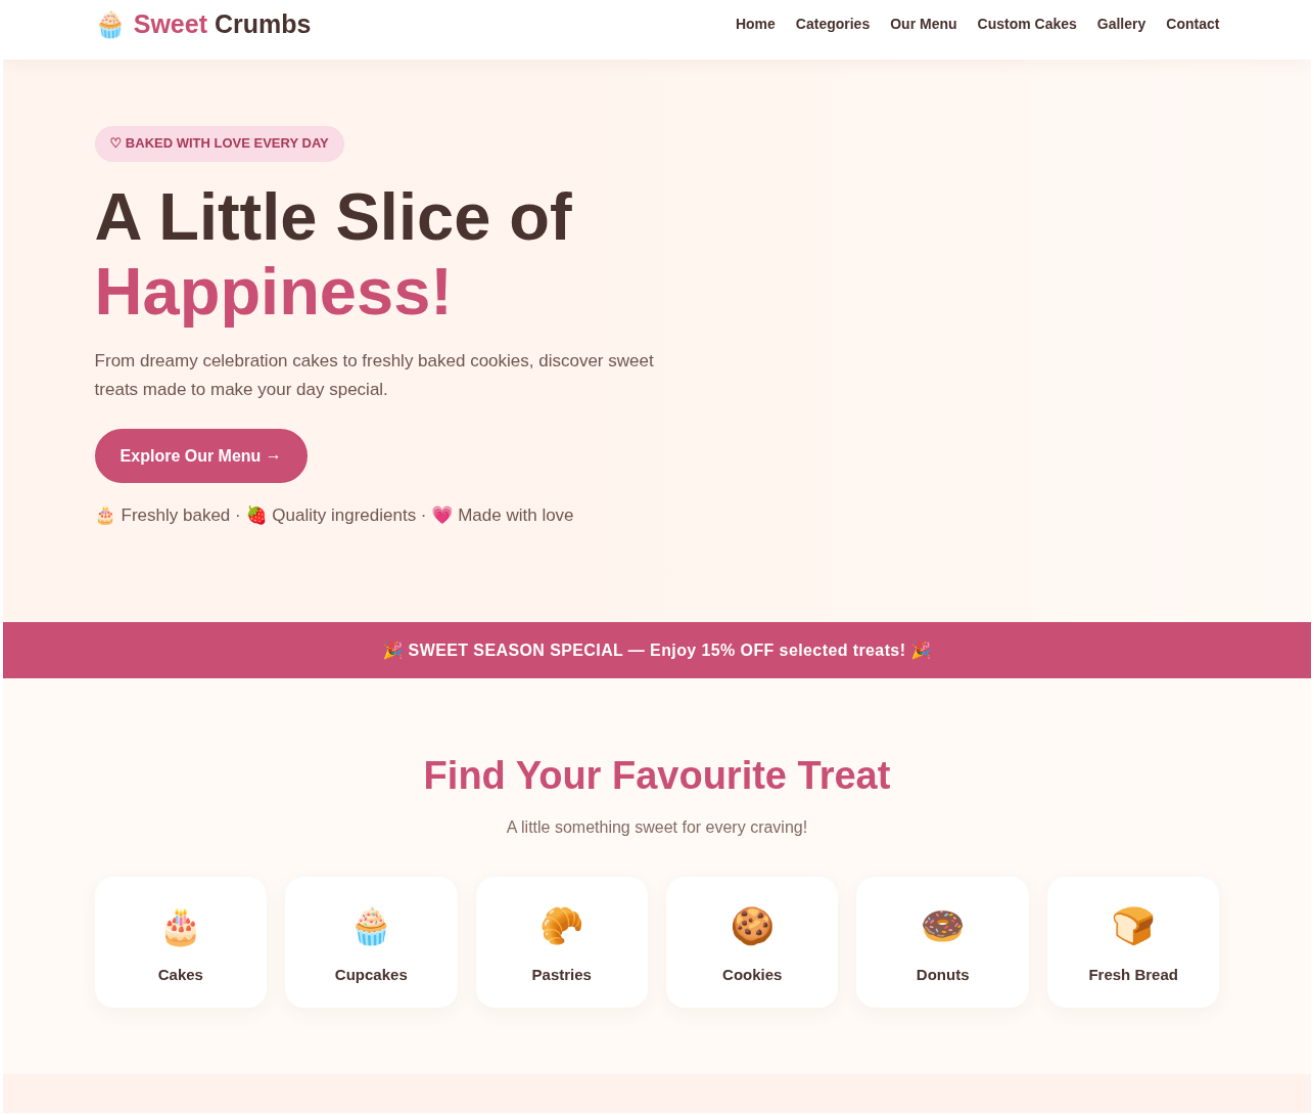

details, promotions, reviews, and some product information are examples and must be replaced or verified before a real launch.

8. Conclusion

Sweet Crumbs demonstrates how HTML and CSS can produce an attractive, organised, responsive bakery website. Future development could add a real ordering system, product search, secure checkout, customer accounts, and a content management interface.
